DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-6 and 10, in the reply filed on 7/6/2006 is acknowledged.
2. Claims 7-9 and 11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/6/2006.

Specification

3. The use of the trademark Inconel has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner, which might adversely affect their validity as trademarks.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by R. Greiner et al (US Patent No. 3,608,349).

Claims 1 and 5:

Greiner teaches a shield having a side wall (4), a top (3), and an inner cavity (figure 1), and one or more evenly spaced cut openings (5) extending through the shield sidewall to the shield inner cavity, configured such that the shield is capable of matingly receiving the impeller shaft into the shield inner cavity (via hole 9) and position the impeller shaft to expose for grinding. The shield of Greiner is inherently capable of performing the functions claimed.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Greiner.

Claim 6:

Greiner discloses the structure above but does not teach the use of INCONEL™. It would have been obvious to one of ordinary skill in the art at the time of invention to use INCONEL™, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416. INCONEL™ is a known material used in guarding for grinding applications and therefore would have been an obvious choice of material for the grinding shield.

Allowable Subject Matter

Art Unit: 3726

8. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach a rod configured to insert through the central opening to adjustable move axially therein having at least a first and second end, the first end adapted to engage the impeller shaft bore in combination with the other limitations of the claim.

10. Claim 10 is allowed.

11. The following is an examiner's statement of reasons for allowance: The prior art does not teach a rod configured to insert through the central opening to adjustable move axially therein having at least a first and second end, the first end adapted to engage the impeller shaft bore in combination with the other limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
